Vision Statement Project Charter

Version 1.0,

prepared by TheFlippedCompany

- Project Title: OnGo
- Start Date: 27/11/2019
- End Date: 31/03/2020
- Team: D'Onofrio Alessandro, Ricca Emanuele, Brighenti Christine, Ferrari Matteo
- Purpose: Make the process of exchanging files between computer easy
- Scope: Computer Technology, School
- Users: Anyone who needs a simple way to access a big amount of files without uploading everything online first
- Milestones:
  27/11/2019 - Start of the project
  28/11/2019 - Design of the architecture
  04/12/2019 - Project Plan
  11/12/2019 - First working request to the server
  18/12/2019 - Firebase Implementation
  22/12/2019 - Google Cloud Storage implementation
  23/12/2019 - First working file exchange
  23/12/2019 - Working prototype of "Origin" program
  15/01/2020 - Completion of NodeJs Server
  20/01/2020 - Working prototype of user interface
  30/01/2020 - Completion of "Origin" program
  28/02/2020 - Completion of user Interface
  31/03/2020 - Final tweaks
- Constrains: The whole application has to work via HTTPS
- Success Criteria: To have a working "Origin" program that sends files, a working NodeJs Server that handles requests and a working interface for the user
